

Shah Jalal Software Engineer

+880 1580-461936

shahjalal99bd@gmail.com

SUMMARY

Full-stack developer with internship experience at Blinkit (Zomato), specializing in backend API development and database management. Proficient in Python, Java, and Angular, with hands-on projects in machine learning and deep learning. Seeking a software engineering role to build scalable web applications.

EDUCATION

2020 – 2025

Bengaluru, KA, India

Bachelor of Technology | CSE (Software Engineering)

Jain University, Bengaluru, KA, India

- Coursework in PCL
- Member of FOSSS CLUB
- Member of iCode
- Relevant courses: C, HTML, Python, Java, Database management System, Agile Software Development
- Project Management
- Dissertation in Problem Solving
- Btech Graduate

TECHNICAL SKILLS

Programming Languages

Python, Java, JavaScript, TypeScript, PHP

Web Technologies

HTML, CSS, Angular, Node.js

Database

MySQL, PostgreSQL

Tools

Git, Github, VS Code, MS Office, IntelliJ

Operating Systems

Windows

Core Concepts

Core Concepts

Full-Stack Development, RESTful APIs, Object-Oriented Programming (OOP), Database Management, Version Control (Git), Agile Methodologies

SOFT SKILLS

Leadership

Communication

Team Collaboration

Problem Solving

ACADEMIC PROJECTS

2022 – 2023

Bengaluru, India

Road Accident Analysis Using Machine Learning

Tech Stack: Python, ML, Streamlit, FastAPI

- **GitHub:** <https://github.com/Jalal99rock/road-accident-analysis>
- Built XGBoost model with 85% accuracy for 4-level accident severity prediction
- Engineered 20+ features and automated data pipeline improving accuracy by 15%
- Deployed interactive Streamlit dashboard with 5 visualization modules
- Created FastAPI with 8 endpoints supporting real-time and batch predictions
- Implemented 7 ML algorithms with hyperparameter tuning (70% faster optimization)
- Containerized with Docker achieving 100% deployment success

2022 – 2023
Bengaluru, India

Age and Gender Detection using Deep Learning

Tech Stack: Python, OpenCV, NumPy, TensorFlow/Keras, CNN

- **GitHub:** <https://github.com/Jalal99rock/GRAE> 
- Designed and trained a Convolutional Neural Network (CNN) on 20,000+ facial images for age and gender classification
- Achieved 84% accuracy on gender prediction and Mean Absolute Error of 3.33 years for age estimation, outperforming baseline models
- Implemented data augmentation (rotation, flipping, brightness adjustment) to increase dataset diversity by 4x and reduce overfitting
- Integrated OpenCV for real-time face detection, enabling live camera predictions at 15+ frames per second
- Deployed a prototype demo that processes facial images in under 200ms, suitable for retail demographic analysis applications

2023 – 2024
Bengaluru, India

Personal and Technical Companion

Tech Stack: React, Django, Python, MySQL, NLP, REST API

GitHub: https://github.com/Jalal99rock/personal_technical_companion 

- Architected full-stack digital assistant with Django REST API (15+ endpoints) and React frontend, serving task management, Q&A support, and goal tracking modules
- Built NLP-powered technical companion processing 100+ developer queries with 90% accuracy using keyword-matching and pattern recognition
- Designed MySQL database with 6 tables and optimized queries, reducing response time by 60%
- Created glass-morphism UI with 8 reusable React components, reducing code duplication by 40%
- Implemented task management with priority badges and real-time progress tracking, increasing user engagement by 45%

2023 – 2024
Bengaluru, India

Communication and Project Management in Software Engineering

Academic Dissertation | Jain University

- Researched and analyzed effective communication strategies and pressure management within software development teams.
- Applied agile project management principles to model efficient workflow solutions.

Professional Experience

01/2025 – 04/2025
Bengaluru, India

Blinkit, Zomato Company

Backend Developer Intern Blinkit, Bengaluru, India 2025 (4 months)

- Designed and deployed RESTful APIs for product catalog management, handling 1,200+ daily product updates with 99.9% uptime
- Optimized MySQL database queries, reducing product data fetch time by 35% (from 180ms to 117ms)
- Collaborated with frontend team to ensure accurate product information display for 10,000+ daily active users
- Implemented automated data validation scripts, reducing manual data entry errors by 60% across the product listing system
- Participated in daily agile stand-ups and sprint planning, delivering all assigned tasks on time across 4 sprints
- Documented API endpoints and database schemas, enabling seamless onboarding of 2 new team members
